

GLITTER PAINT MAKER

PRODUCT DESCRIPTION

sparkling glitter for decorative finishes A shimmering metallic glitter specially developed to add to any water based paint or varnish giving sparkles of light to your finish. Simply mix with your choice of coloured paint or varnish to create a sparkling decorative effect.

ideal for • adding to chalk paint • metallic paint • emulsion paint • furniture paint • ornaments • walls • painted surfaces • paper • fabrics • most porous surfaces

unique qualities • shimmers when dry • superior quality • fine metallic particles

Available in Gold Glitter, Pink Glitter, Rainbow Glitter, Silver Glitter.

APPLICATION

Ensure product is well mixed and that all surfaces are clean and free from grease, oil, dirt and contaminants. Read the instructions and warnings carefully on the product you are mixing the glitter into before starting. Add the glitter gradually to your chosen paint or varnish while stirring slowly and thoroughly. We recommend 75g of glitter per 2.5L of paint or varnish, though you can choose to add more or less depending on the coverage you require. Use a smooth/gloss roller for best results and even distribution of glitter. The glitter will achieve its full effect when the paint or varnish is dry. We recommend trying on a test area first, if you would like to get that higher level of sparkle then rub the painted surface with a dry lint free cloth after the glitter paint is dry but not fully cured.

caution We recommend familiarising yourself with the effect on a small test area before starting work. The glitter may settle in the mix if left too long before application.

COVERAGE

The coverage, drying, curing, will be the same as quoted on your chosen paint.

CLEAN UP

Any equipment used can be cleaned using soap and water before the clear coat dries. Wipe any excess off surfaces with a damp cloth.

PACKAGING

75 g.

STORAGE

Store in unopened containers in a cool dry place away from direct sunlight.

HEALTH SAFETY AND THE ENVIRONMENT

Non-hazardous. Ensure good ventilation. Keep out of reach of children. Contact with eyes-wash immediately with warm water. Remove excess from tools and mixing vessels before washing in warm soapy water. Do not empty containers into drains or watercourses.

The information supplied herein is accurate to the best of our knowledge. Since conditions and methods are beyond our control, no warranty is expressed or implied. You are advised to assess the suitability of the product on a test area before application

Date of issue: January 2019
